Repeater Pairs (GMRS Only)

Repeater	Input - You Transmit	Output - You Listen	Notes
RPT15	467.5500	462.5500	Input = output + 5 MHz
RPT16	467.5750	462.5750	Input = output + 5 MHz
RPT17	467.6000	462.6000	Input = output + 5 MHz
RPT18	467.6250	462.6250	Input = output + 5 MHz
RPT19	467.6500	462.6500	Input = output + 5 MHz
RPT20	467.6750	462.6750	Input = output + 5 MHz
RPT21	467.7000	462.7000	Input = output + 5 MHz
RPT22	467.7250	462.7250	Input = output + 5 MHz

All frequencies are in MHz. GMRS requires an FCC license; FRS is license-by-rule.

GMRS mobile/base radios may not transmit on channels 8-14. Repeater inputs are GMRS-only.

Community convention: Channel 20 (462.675 MHz) with CTCSS 141.3 Hz is often used as a travel/assistance channel.

Reference only - verify against current FCC Part 95 rules and your radio manual.
